## Integrating Anti-Spyware into IT Security Strategies

As the pervasiveness of spyware grows at a rapid pace, IT professionals and corporations are faced with the challenge of protecting corporate assets, confidential data, employee privacy and productivity from the effects of a spyware attack. Accomplishing this requires, first and foremost, the assistance of a complete, powerful, dedicated anti-spyware tool.

### MAX Secure Spyware Detector Enterprise Edition - Secure the Enterprise

Spyware Detector Enterprise leverages client-server architecture to detect and delete spyware across a network while putting control in the hands of IT administrators, not end-users. Spyware detector offers comprehensive scanning and eradication, centralized management, automatic spyware definition updates and free upgrades. Created to protect corporations and large institutions from spyware intrusions and their subsequent effects on productivity, integrity and confidentiality of data systems and networks.

#### The Need

##### Spyware poses a significant threat to corporations

- Compromised security of corporate information, data and intellectual property
- Diminished computer performance
- Reduced employee productivity
- Increased bandwidth consumption
- Loss of sensitive and confidential data

#### Threat to an Enterprise

- With spyware, intruders are able to gather confidential company information without consent.
- Spyware are more sophisticated tool for marketers, as this technology can target to people at work, taking advantage of a user's most significant time online.
- Adware pop-ups can hinder productivity by forcing employees to manage these distractions.
- Spyware decreases the productivity of IT support staff, forcing them to deal with all unwanted support requests increasing the overheads.
- Some spyware continuously broadcast information over the corporate networks, sapping valuable bandwidth that could otherwise be used for faster communications.
- If companies are not aware that spyware are responsible for wasting their bandwidth; they may incur unnecessary expenses to purchase additional bandwidth.

### MAX Secure Spyware Detector Enterprise Edition Provides Centralized managed solution, empowering the Enterprises to

- **Protect** - Confidential Information
- **Prevent** - Theft of Identity
- **Preserve** - Sensitive and Confidential Data
- **Personalize** - What is wanted or un-wanted
- **Prove** - Absolutely Spyware Free Network.
